Sprint 3

VQA

Goals set for Sprint 3

Set up environment on SCC

Simulate OpenSource Model using VizWiz Dataset

Achievements

- Installed all the necessary packages and software versions on SCC

Preprocessed the images from the VizWiz Dataset

Failed to extract image features from the dataset

- Ran pretrained model based on MUTAN

Goals for next Sprint

Complete the basic simulation of the training model

Make it compatible with other datasets

Avoid overfitting of the model based on images
